Synopsis:

English

A psychedelic trip through the eyes of a backpacker, who is also questioning the appropriateness of the critical mores of the Lonely Planet guide. Starting with a parachute jump, often manipulated images fly by at breakneck speed. In Lovely Planet our heart beats faster and our retina gets overloaded by images and impressions.

Dutch

Een psychedelische trip door de ogen van een backpacker, die tegelijkertijd kritische kanttekeningen plaatst bij de mores van de backpackers die zich laten leiden door de Lonely Planet-reisgidsen. De beelden vliegen in razend tempo voorbij en ons hart klopt sneller en sneller.
